

Pregnancy and Neonatal Outcomes in COVID-19

Study Bulletin: Thursday 7 January 2021

Submitted case reports for pregnant individuals admitted to hospital or in midwifery care between January 1, 2020 and January 7, 2021.

Important considerations: Raw data, not yet cleaned or adjusted; intended to inform on study progress and not as interim or final analysis. For use by collaborating centres and not for wider distribution.

Week of pregnancy at delivery?	n = 4558	%
<23 weeks	66	1.4
23 – 36 weeks	348	7.6
≥37 weeks	4144	90.9

Outcome of delivery?	n = 4596	%
Miscarriage	54	1.2
Intra-uterine death/ stillbirth (>22+6 weeks gestation)	18	0.4

Number of participants with fetal growth restriction?	n = 4594	%
Fetal growth restriction	197	4.3
