

## Pregnancy and Neonatal Outcomes in COVID-19

### Study Bulletin: Thursday 18 February 2021

Submitted case reports for pregnant individuals admitted to hospital or in midwifery care between January 1, 2020 and February 18, 2021.

**Important considerations:** Raw data, not yet cleaned or adjusted; intended to inform on study progress and not as interim or final analysis. For use by collaborating centres and not for wider distribution.

Week of pregnancy at delivery?	n = 5824	%
<23 weeks	85	1.5
23 – 36 weeks	472	8.1
≥37 weeks	5267	90.4
Outcome of delivery?	n = 5872	%
Miscarriage	63	1.1
Intra-uterine death/ stillbirth (>22+6 weeks gestation)	28	0.5
Number of participants with fetal growth restriction?	n = 5865	%
Fetal growth restriction	257	4.3
